</table>
| 17 January Tuesday  | **Professor Tamas Revesz**  
University College, London  
*Progression of neuropathology in Parkinson’s Disease*                                                                                     | Lecture Theatre  
Le Gros Clark Building                     |
| 7 February Tuesday  | **Dr Oliver Bandmann**  
Sheffield Institute of Translational Neuroscience, University of Sheffield  
*New strategies to identify disease – modifying treatment for Parkinson’s Disease*                                                                | Lecture Theatre  
Le Gros Clark Building                     |
| 12 March Monday     | **Dr Huaibin Cai**  
National Institute on Ageing, NIH, USA  
*Molecular determinants of dopaminergic neuron loss in Parkinson’s Disease*                                                                         | Lecture Theatre  
Le Gros Clark Building                     |
| 24 April Tuesday    | **Dr Kostas Vekrellis**  
Biomedical Research Foundation, Athens, Greece  
*In vivo assessment of alpha-synuclein secretion. Possible therapeutic implications in Parkinson’s Disease*  | Lecture Theatre  
Le Gros Clark Building                     |
| 10 May Thursday     | **Dr Clive Svendsen**  
Cedars-Sinai Regenerative Medicine Institute, Los Angeles, USA  
*“Disease in a dish”: A new era for modelling human neurological disorders with stem cells*                                                   | Lecture Theatre  
Le Gros Clark Building                     |
| 19 June Tuesday     | **Professor Birgit Liss**  
Institute of Applied Physiology, University of Ulm, Germany  
*Distinct functions and fates of dopamine midbrain neurons in health and Parkinson’s Disease - a tale of two ion channels?*  | Lecture Theatre  
Le Gros Clark Building                     |
| 3 July Tuesday      | **Dr Tiago Outeiro**  
Cell and Molecular Neuroscience Unit, Faculdade de Medicina de Lisboa, Portugal  
*From the baker to the bedside: unraveling the molecular basis of Parkinson’s Disease*                                                            | Lecture Theatre  
Le Gros Clark Building                     |
| 18 September Tuesday| **Professor Kevin Morgan**  
Faculty of Medicine & Health Sciences, University of Nottingham  
*Biomarker discovery in Alzheimer’s disease-myth or reality?*                                                                                  | Library  
Sherrington Building                       |
| 16 October Tuesday  | **Professor Uwe Walter**  
Department of Neurology, University of Rostock  
*Value of transcranial sonography in the diagnosis and treatment of Parkinson’s disease*                                                            | Seminar Room B,  
West Wing level 6, John Radcliffe Hospital |

<tr>
<th>Date and Time</th>
<th>Speaker and Title</th>
<th>Venue</th>
</tr>
</thead>
</table>
| 16 October Tuesday 4pm | Dr Tilo Kunath  
Centre for Regenerative Medicine, University of Edinburgh  
**Modelling synucleinopathies with human pluripotent stem cells** | Library  
Sherrington Building |
| 13 November Tuesday 4pm | Professor Masud Husain  
Nuffield Department of Clinical Neurology and Department of Experimental Psychology, University of Oxford  
**Inattention, Impulsivity and Apathy in Parkinson’s disease** | Library  
Sherrington Building |
| 4 December Tuesday 4pm | Dr Nick Allen  
School of Biosciences, Cardiff University  
**Stem cell-derived neuronal models to study Huntington’s disease** | Lecture Theatre,  
Dept of Pharmacology |
| 13 December Thursday 12pm | Professor Ola Söderberg  
Department of Immunology, Genetics and Pathology, Uppsala University  
**Analysis of signaling network activity at a single cell level** | Library  
Sherrington Building |
